Barracuda XDR

Protect your customers against advanced cyberthreats

What is Barracuda XDR?

Barracuda XDR is a 24x7 XDR service that protects your customers against advanced cyberthreats.

The eXtended Detection and Response (XDR) platform is backed by 24x7 Security Operations Centre (SOC), meaning you can address threats efficiently and deliver services with ease.

Endpoint agnostic, Barracuda’s XDR solution provides a single pane of glass view across all threat vectors, allowing you to provide multi-layered security, comprehensive detection, and threat intelligence to your customers.

Why Barracuda XDR?

Enforce cybersecurity hygiene – proactively monitor, detect and respond to threats with the support of a 24x7 Security Operations Centre (SOC).

Gain security expertise – all incidents are triaged, then you are alerted and guided on the resolution.

Deliver multi-layered security services with ease – offering protection for major attack vectors across endpoint, email, cloud, network and server.
Barracuda XDR multi-layered security family

XDR solutions can become expensive, so Barracuda have broken down their XDR offering to make it affordable, accessible, easy to deploy, use and license. Splitting it into five different areas, the solution gives your customers the flexibility to choose the options they want. The Barracuda XDR multi-layered security family include:

1. XDR Network Security

2. XDR Monitored Endpoint Security

3. XDR Email Security

4. XDR Server Security

5. XDR Cloud Security

Plus, Barracuda integrates with over 40 different vendors so customers that have got existing solutions in place can still benefit from Barracuda XDR!
How Barracuda XDR works

The Workflow for your XDR Solution

Events (your environment)

eXtended Visibility
  SIEM
  SOAR Technology
  SOC Analysis
  Single UI

Detection
  Alarm Analysis across Multiple Data Sources
  Mature XDR SOC

Response
  Alert / Remediate
  One number to call (MSP / Customer)

XDR is often seen as an enterprise solution, but all customers from SMBs to enterprises need to have an effective solution in place. Through the eXtended Visibility, Detection and Response, you can rest assured that security threats aren’t just detected and alerted, but also responded to and fixed with the guidance of Barracuda’s 24x7 SOC team.
