Barracuda Total Email Protection for MSPs

Email is the number one business communication tool, and is also the number one attack vector. Secure your customers’ business, data, and employees with the most comprehensive protection against all email threat types, from spam and malware, to business email compromise and account takeover. Create a complete email security service that combines secure email gateway, email continuity, data protection, compliance archiving, AI-powered fraud protection, and automated incident response.

Complete email protection
Adequately protecting your customers’ email environments requires multiple layers of defense, including gateway security, inbox protection, and incident response, combined with artificial intelligence and machine learning technology to ensure today’s sophisticated email threats are detected before they cause damage to your customers.

Global threat detection network
Barracuda combines a global threat intelligence database and artificial intelligence to stop email threats that others can’t. Our intelligence database collects email, network, and application threat data from over 200,000 companies worldwide, allowing us to detect threats faster.

Automate email attack response
Respond to email attacks quickly and easily with automated incident response. Accurately identify the scope of the attack and remove malicious messages directly from impacted users’ inboxes post-delivery.

Elevate your email security service offering
Differentiate your MSP business from its competitors with a Total Email Protection email security service offering that is easy-to-deploy and easy-to-manage. Eliminate the hassles and risks associated with implementing standalone and disparate email security solutions.
Total Email Protection Solution

Email Security Service
- Cloud-based protection against spam, malware, viruses, phishing and other email-borne threats
- Advanced Threat Protection using full-system emulation sandbox
- Agentless email encryption
- Link and typosquatting protection
- LDAP and multi-factor authentication
- Web-based management portal
- Centrally managed security policies
- Mobile applications

Cloud-to-Cloud Backup
- Backup and recovery for Exchange Online, SharePoint, OneDrive, and Teams
- Centralized administration
- Custom retention policies
- Granular scheduling and restores
- Automated or manual backups
- Multi-selection restores
- Granular recovery of SharePoint items
- Restore back to Exchange Online or OneDrive for Business, or download files locally

Email Continuity
- Failover to cloud-based email service
- Up to 96 hours of email continuity
- Emergency mailbox to send, receive, read, and respond to email

- Archive directly from Office 365 to cloud-based archive
- PST management for legacy email
- Granular retention policies
- Full text search with multiple operators
- Legal hold
- AES 256-bit encryption at rest and in transit
- Public key cryptography (RSA 1024)
- Isolated customer metadata databases
- Data stored in-country (based on company location)
- SAE 16 or SOC audited data centers

Forensics and Incident Response
Identification
- Outlook Add-in and one-click threat reporting.
- Threat hunting

Investigation
- Advanced search with context and relevance
- Review users who interacted with malicious emails
- Identify high-risk users
- Automate incident response workflow

Response
- Block future emails coming from specific regions
- Delete emails directly from user inboxes
- Automatic post-delivery remediation
- Send alerts automatically to all impacted users

API-base Inbox Defense
AI for Real-Time Protection
- Direct connectivity to Office 365
- Fast, easy set-up (less than 5 minutes) Stops spear-phishing attacks, business email compromise (BEC), extortion, and other socially engineered attacks
- Artificial Intelligence to detect and stop email attacks
- Automatic message quarantining
- Alerts to administrators and users

Account Takeover Protection
- Detects and alerts account takeover activity
- Notifies external users and deletes compromised email
- Blocks attackers’ access to compromised account
- Provides visibility into inbox rule changes and suspicious sign-ins

Domain Fraud Protection
- DMARC authentication, reporting and analysis
- Intuitive wizard to help set up DMARC authentication
- Prevent domain spoofing and brand hijacking

Reporting
- Threat environment analytics
- Attacks detected over time
- Insights into impersonation and BEC attacks

About Barracuda MSP
As the MSP-dedicated business unit of Barracuda Networks, Barracuda MSP enables IT managed service providers to offer multi-layered security and data protection services to their customers through our award-winning products and purpose-built MSP management platforms.
